safer.fun

**By Adam Bouabda, Alper Özyurt, Walid Sofiane , Erengazi Mutlu**

Revolutionizing Memecoin Launches on Solana

Introducing Safer.fun, a platform designed to transform memecoin launches on the Solana blockchain. We address vulnerabilities in the booming market, protecting users from malicious actors.

Days to Reach $100M in Revenue

The Memecoin Market Challenge

Market Growth

Solana's memecoin market is booming. Platforms like Pump.fun achieved $100 million revenue in 217 days.

Consequent Vulnerabilities

Malicious actors exploit the system. Snipers and rugging developers systematically extract liquidity from genuine users.

Malicious Actors Exposed

Snipers

Automated bots that instantly buy new coins without incentivizing dev to sell on them. They dump their holdings for minimal profit over the next early buyers.

Rugging Developers

Exploit first-buyer position. Spam coin creations and dump their holdings for a quick profit.

Our Philosophy

Neutralize Malicious Actors

Eliminate snipers and rugging developers by removing their systematic advantages, making exploits unprofitable and, while carefully balancing control measures to stay within ethical boundaries.

Empower Genuine Users

Provide fair and equal opportunities for participation, fostering a trustworthy environment where genuine users can thrive and benefit from memecoin launches.

Safer.fun : A Fair Launch Protocol

Pre-Launch Auction

Democratize early buying positions through transparent auctions. Real-time ranking for bidders.

Post-Launch Token Distribution Rules

Tokens released in batches. Unlocks tied to random market cap and time thresholds.

Versatile Plug-in

Can be integrated as a pre-layer on any token launch platform or even decentralized exchanges

Auction Mechanics

Bid Submission

Bidders send purchase amount and auction fee. Determines rank among early buyers.

Real-Time Rank Adjustment

Participants can adjust bids to secure desired positions, or withdraw, at any time. Promotes fair competition.

Exit Window

Withdrawal-only. Allows reassessment after auction. Ensures transparency and fairness for all participants.

Are these fees worth it for genuine users?

Reinvestment of Auction Fees

Up to 80% of auction fees are reinvested in the coin, creating upward pressure on the token's price

Burning Purchased Tokens

Tokens bought are immediately burned

Made with Gamma
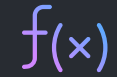

Token Distribution Strategy

Batch Release

Tokens distributed gradually, not all at once. Prevents immediate dumping.
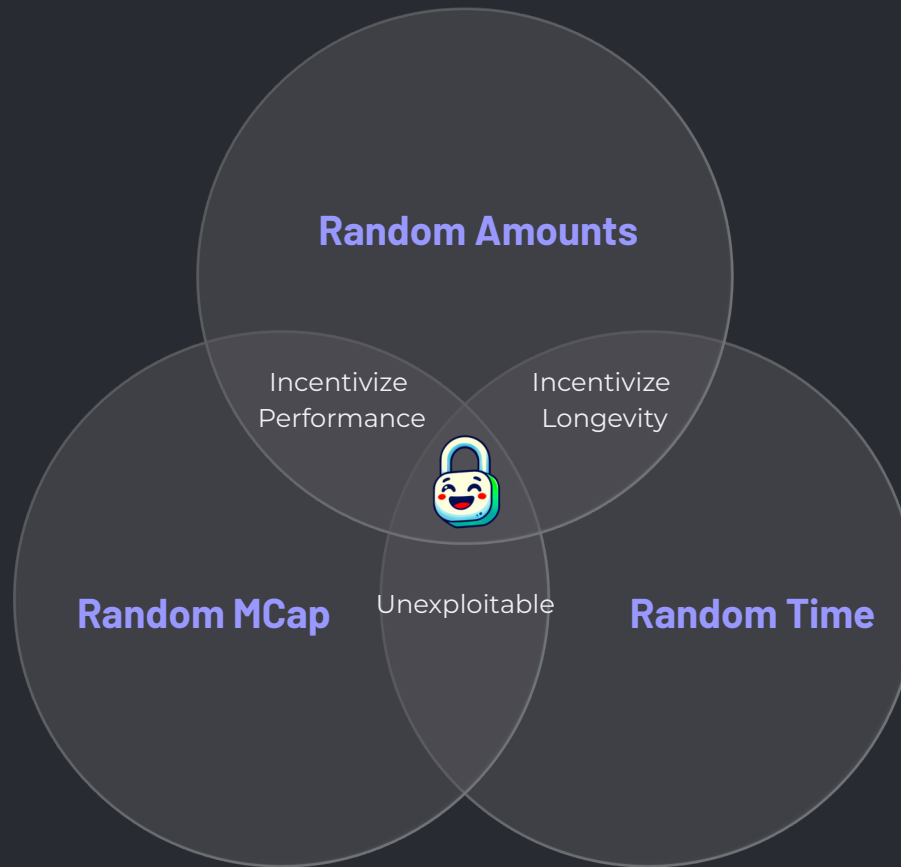

Random Unlocks

Tied to market cap and time. Introduces unpredictability, discouraging manipulation, increasing smoothness of launch
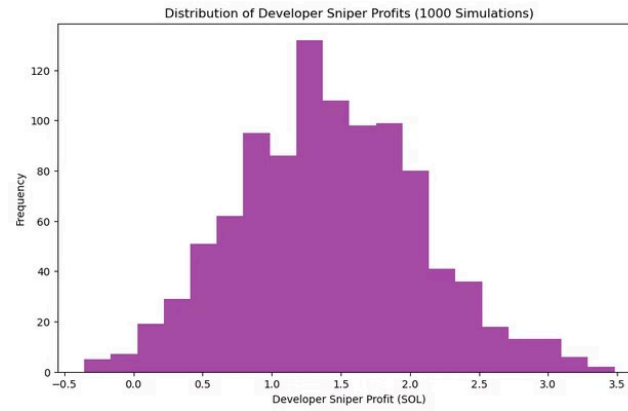

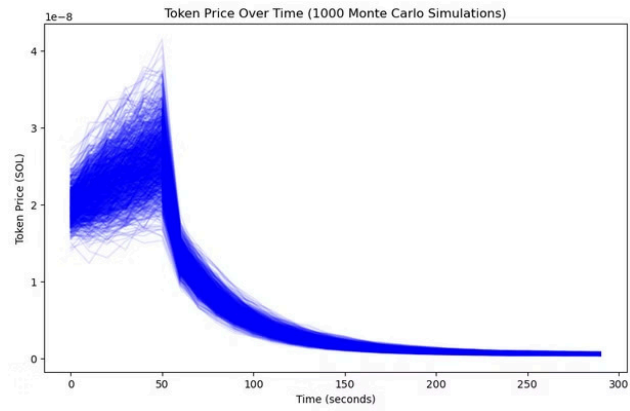

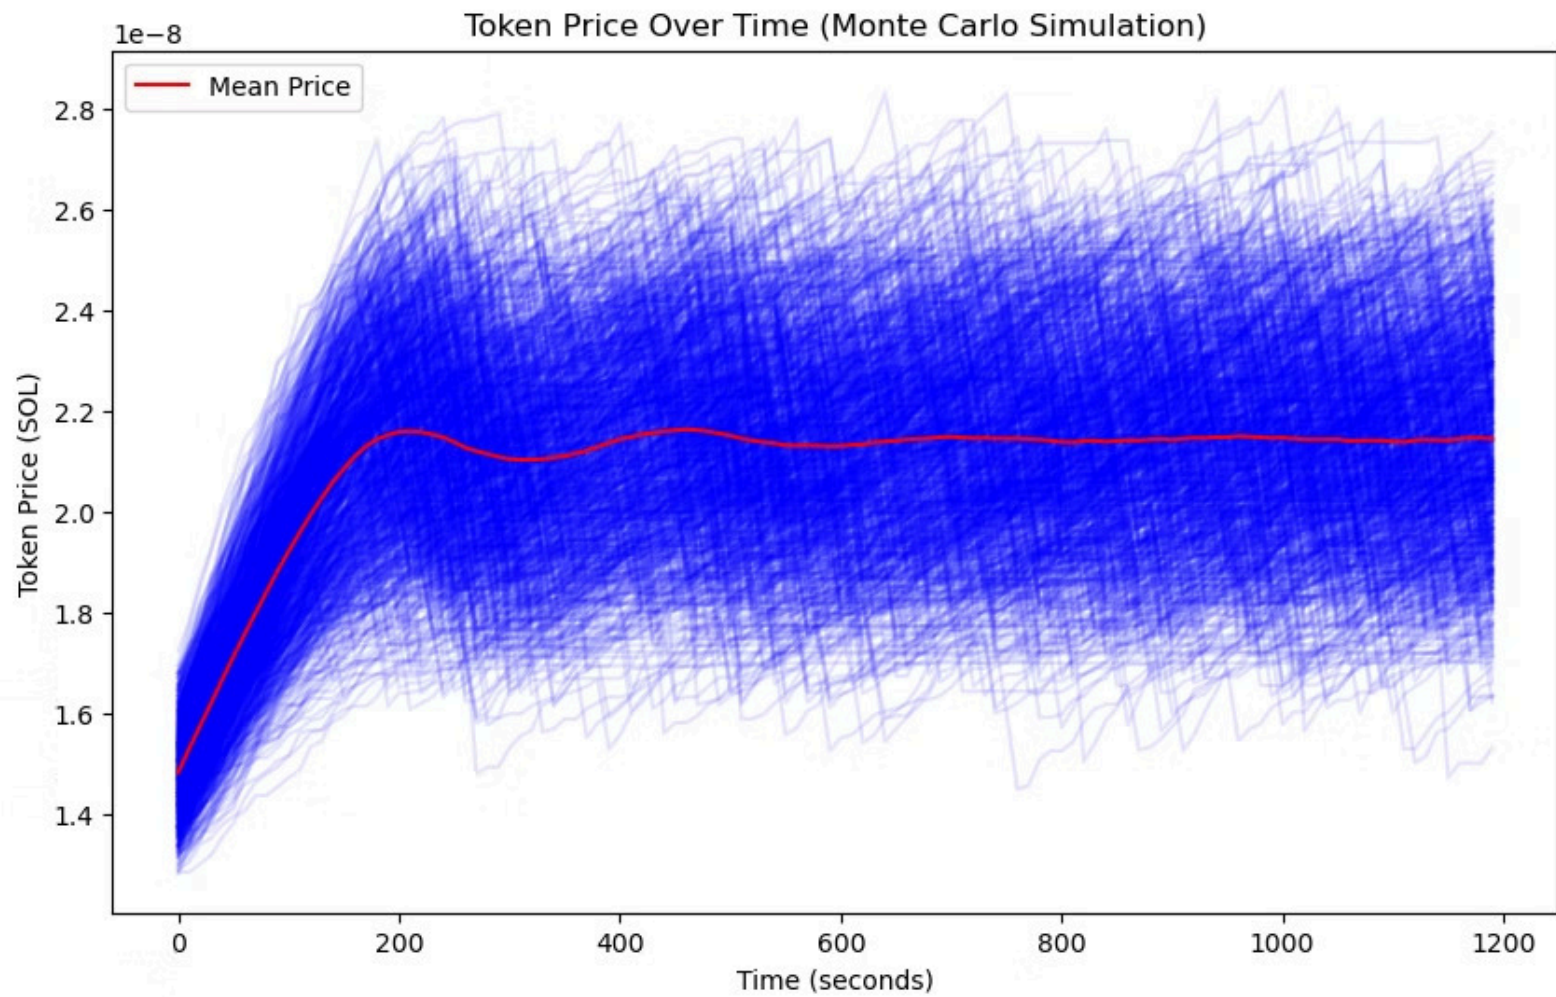

Rank-Based Distributions

Later pre-buyers will receive earlier unlocks on average. Balances advantages across community members,.

3 Axis of Randomness

Random Amounts

Incentivize Performance

Incentivize Longevity

Random MCap

Unexploitable

Random Time

Token Price Over Time (1000 Monte Carlo Simulations)

Distribution of Developer Sniper Profits (1000 Simulations)

Token Price Over Time (Monte Carlo Simulation)

Revenue Model

Staking Pre-Buy Funds

Earn yield from liquid-staking the SOL of pre-buyers. Using JitoSol

Auction Fees

Remaining 20% of auction fees are retained as protocol revenue.

Withdrawal Fee

Minimal fee to discourage spamming a position everywhere
